Tnakita

Annual Report 2019

Year Ended March 31, 2019

Bringing invaluable tools to people and their living environments———

Makita Corporation was founded in Nagoya (Aichi prefecture) in 1915 as an electric motor sales and repair company. In 1958, it became the first company in Japan to manufacture and sell portable electric planers.

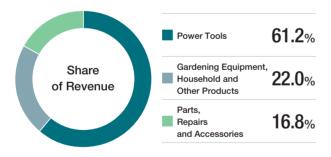

Over the subsequent 10 years, Makita built a business network in Japan, some 80 locations strong, based on the philosophy of moving closer to our customers. In 1970, we established our first overseas subsidiary in the USA. And, whether in Japan or overseas, striving for robust after-sales services has allowed us to earn the trust of craftspeople who rely on power tools. In 2015, we celebrated our 100th anniversary and currently operate 116 sales and service bases in Japan, augmented by some 50 overseas bases, while selling products in approximately 170 countries around the world. Forging ahead toward our next 100 years of growth, Makita will strive to capture and maintain worldwide market leadership in power tools in construction markets around the globe. As we do so, we will pursue our mission of "Conversion from engine-powered to battery-powered products," strengthen initiatives in our battery-powered gardening equipment business, and continue to strive for growth by solving social issues.

To Our Stakeholders

Makita will continue striving for growth by solving social issues as we take on the challenges of the next 100 years.

Today's world is one of great fluctuation in global politics and the economic climate, which demands that companies have the ability to flexibly respond to change. In order to focus on customer and market shifts in each part of the world, and to reflect those shifts in our products and services, Makita is building a global network for production, marketing, and after-sales services. We will continue furthering our ability to handle changes by fully leveraging our strength born from Makita's philosophy emphasizing on-site focus.

As a global supplier of a comprehensive range of tools for creating comfortable homes and living environments,

we know that we must embrace challenges in new fields that will allow us to continue to succeed 100 years from now. As a result, Makita is currently undergoing a second renaissance in which we strengthen not only our power tool business but also our gardening equipment business while building a foundation for achieving growth in perpetuity. Makita seeks to be a company that exists in harmony with society as we pursue growth by solving social issues such as preservation of the global environment and improvement of customers' workplace environments.

Corporate Slogan / Corporate Attitude

Long-term Target

Strong Company

Makita has set itself the goal of contributing to the creation of a sustainable society and consolidating a strong position in the industry worldwide as a global supplier of a comprehensive range of tools for creating comfortable homes and living environments, including cordless power tools, battery-operated outdoor power equipment, and pneumatic tools.

Management Policy / Quality Policy

- 1. Makita strives to exist in harmony with society (a company that observes laws and regulations, acts ethically and never allows intervention of the anti-social organizations).
- 2. Makita values its customers (a market-driven company).
- 3. Makita is managed in a consistent and proactive manner (a company that strives to exist in perpetuity by adhering to a sound profit structure).
- 4. Valuing a stalwart corporate culture, Makita encourages each individual to perform to his or her highest level (a happy company).

Fundamental Policy Regarding Product Safety

Makita has established a system for providing safe products to our customers (users and consumers), and our whole company is dedicated to ensuring that customers can enjoy peace-of-mind when using our products. In the unlikely event of a major unforeseen product accident, we will work to speedily and accurately gather information regarding the accident, and to disclose that to customers and all related parties, both inside and outside the company.

Code of Ethics

- 1. Honest and ethical conduct; no conflict of interest
- 2. Compliance with applicable laws and regulations
- 3. Full, fair, timely and understandable disclosure
- 4. Accountability for adhering to this Code
- 5. Enforcement mechanisms
- 6. Approval for waiver of this Code

Code of Conduct

- 1. Am I acting in accordance with ethical guidelines? (Would I be unashamed in front of anyone?)
- 2. Am I looking at things from the customer's point of view rather than the company's point of view? (Am I leaning more towards the customer than my supervisor or my colleagues?)
- 3. Am I acting and thinking independently and taking on challenges? (Am I caught up in past experiences and successes?)
- 4. Am I persistently improving and innovating technology? (Is there a reason we have to do it this way?)
- 5. When I am on site, do I respect the opinions there? (Do I accurately gather information and communicate adequately?)

Implementing investment on the largest scale to date. We will achieve solid growth from a long-term perspective.

Munetoshi Goto

President, Representative Director

What is your assessment of performance in fiscal 2019?

We achieved the highest revenue in our history.

Revenue came to ¥490.6 billion, up 2.8% year on year, in fiscal 2019, ended March 31, 2019, which was a year of record numbers for Makita both inside and outside Japan. While operating profit declined slightly year on year, to ¥78.3 billion, it was still the second highest in our history.

Domestically, construction demand rose ahead of Tokyo's hosting of the Olympic Games, and sales charted a steady path. Looking overseas, the problem of labor shortages continued in many regions, while our products were highly praised for their convenience. Our new lithium-ion battery products and gardening equipment—two categories of particular focus—were well received in various markets. Makita saw substantial results from a steady increase in sales in Europe and in emerging markets in Central and South America.

Additionally, we carried out record-high capital expenditures of ¥23.9 billion in fiscal 2019, as we move to expand future supply capacity. We also proceeded with consistent preparations to meet robust demand in each market, including strengthening production capacity at our plants in China and Romania. Furthermore, we enhanced our platforms closely aligned with local bases inside and outside Japan, including building out sales and service bases.

At the same time, factors that squeezed operating profit included an increase in employee numbers as we target growth, as well as fortified advertising campaigns, a strengthening yen, and a surge in raw material costs. In order to grow steadily from a long-term perspective, we feel that it is necessary to solidly confront these factors, expand our sales and service networks going forward, and proactively streamline staffing and operator-less systems at production bases.

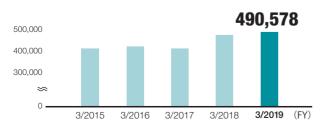

What are you focusing on from an ESG perspective?

We are developing and recommending products that contribute to solving social challenges.

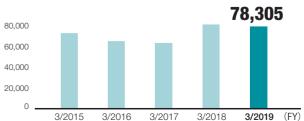

At present, labor shortages are an acute problem in many regions, be they developed or emerging countries. First, Makita must consistently develop products that streamline tasks that have been conventionally performed by multiple workers—making them tasks that a single person can perform—as we create products that also improve productivity, shorten work hours, and improve health and safety for laborers. On top of this, I feel that it is crucial to respond quickly when product issues arise, as we continue to build logistics and service frameworks that get Makita products into customers' hands. By meeting these societal and consumer needs, we are contributing to solving the social issue of labor shortages.

Moreover, as myriad global disasters occurred in 2018, we received feedback from customers saying that Makita's battery-powered lights and radios were extremely instrumental. Consequently, from February 2019, we have been selling these items as part of emergency supply kits. Makita has traditionally maintained a deep commitment to "always being on the support side in times of disaster," so as we receive progress reports from the actual disaster site of how we supported the customers and business partners in need. Being of service to our partners, especially during difficult times, is Makita's commitment. Going forward, we will continue endeavoring to solve long-term social issues and pursue operations aligned with society and customers, so that we can respond to the disasters that may occur and the customer concerns that may arise.

Operating Profit (Yen in millions)

Interview with Management

Additionally, since people are the wellspring of Makita's corporate growth, we value our people by emphasizing "a stalwart corporate culture, encouraging all individuals to perform to their highest level." Given that some 80% of the Makita Group's employees are of non-Japanese nationality, we have had long-standing respect for diversity and have tried to localize our businesses. Through this emphasis on local operations, we have established a structure that brings value to markets, while respecting each region's culture and customs. Currently, we have three non-Japanese employees serving as corporate officers.

In terms of corporate governance, we have appointed two independent Outside Directors and three independent Outside Audit & Supervisory Board Members who provide timely input to the Board of Directors and help ensure oversight of management. In addition to internal Directors, independent Outside Audit & Supervisory Board Members visit overseas subsidiaries to perform audits and maintain a sound management structure Group-wide.

With regard to preventing corruption, we have established a "Code of Ethics" and "Guidelines to the Code of Ethics for Makita," which stipulate standards for Director and employee conduct. Throughout the Company, we are promoting ethical conduct, prohibitions against conflicts of interest, compliance with relevant laws and regulations, appropriate information disclosure, and respect for human rights, which includes offering ethics education once or more per year.

What are your main initiatives for fiscal 2020

A We will pursue development, production capacity enhancements, and service improvements that intuit customer needs.

On the product development side, we will continue expanding our range of cordless offerings. We are focusing on developing gardening equipment as the second pillar of our business after power tools. At the same time, we will develop products useful on diverse work sites as we aim for increased market share.

On the production side, we will expand plants in Romania, China, and elsewhere as we continue building out our production framework. Additionally, we will utilize robotics, the IoT for machinery maintenance, and other approaches to actively streamline staffing, create operator-less systems, and enhance efficiency.

In terms of sales and marketing, we will strengthen logistics functions domestically, as well as in Germany, the UK, and the USA, while tapping new sales channels and expanding sales bases to meet new markets for gardening equipment and other divisions. Also, as the number of our products increases, we have launched a new response system that utilizes AI, allowing us to accurately and quickly handle customer inquiries.

Starting from the UK, then moving to other English-speaking countries, and now we are rolling out this system in Spanish-speaking countries as well, and will expand it to cover other languages in the future.

Please tell us about your approach to dividends and shareholder returns.

A Setting 10 yen as a minimum for our annual dividend payment, we are striving for stable dividends following our basic policy to target a 30% consolidated payout ratio.

Last, what message would you like to give stakeholders?

We will steadily move forward in step with stakeholders as we keep our sights set on long-term growth.

Makita's long-term goal is to be a "strong company." In order to display long-lasting strength in any business environment, the essential management policy for Makita is to "strive to exist in harmony with society," "value our customers," and promote "a stalwart corporate culture, encouraging all individuals to perform to their highest level." From the outset, Makita's ability to build our current position in the power tools market has come from our desire to move closer to customers. As such, we have dedicated energy to developing products and establishing service platforms that minutely respond to customer needs.

Consequently, we will continue identifying the needs of the times, passing on our corporate DNA of developing alongside customers, and boldly taking on new challenges as we build the foundation for the next 100 years. First, we will leverage Makita's strengths and strive for a cordless shift by using lithium-ion batteries in all of our products. Furthermore, we will grow sales in the gardening equipment business to bring them up to a level rivaling the power tools business. In the coming several years, I would like to emphasize active investments that will support these ambitions.

Makita is grateful for the on-going understanding of stakeholders, because it is this support that allows us to keep our eyes focused on long-term growth and steadily carry out what we must. We intend to manage our business with the aim of achieving mutual growth with all stakeholders, and we look forward to everyone's ongoing support.

Special Feature

Expanding Global Sales of cordless OPE.*

Presenting product ideas for replacing engine-powered products with battery-powered products.

OPE has largely been engine powered, which has advantages in terms of power and force, but also has exhaust that affects the environment, noise and vibration that affect local surroundings, and physical burdens that affect users. Furthermore, a certain degree of experience and technique is required to start up engine-powered equipment, which has not made them user friendly for some users.

Given these challenges, Makita designed cordless OPE with the following advantages.

No exhaust is released during use

Low noise and

low vibration

Lower environmental burden

· Less physical strain on users

 Helps ensure a more comfortable environment in and around the workplace

Zero start-up procedures, no refueling, and a lightweight design

 Easy to use for women and the elderly

New product development and capital expenditures leveraging the strengths of battery-powered products.

In this day of globally intensifying environmental protection and labor shortages, we are called upon to deliver more environmentally and user friendly products. That is why Makita addresses these problems by providing customers with optimal solutions utilizing the advantages of cordless OPE. Moreover, we use product and service feedback from customers around the world to accurately understand customer needs and incorporate that knowledge into product improvements.

Going forward, we will continue energetically making capital investments and developing new products as we focus on growing cordless OPE as the second pillar of our business. In the process, we will contribute to improving work performance and the comfort for our customers.

Low

*During equipment operation

Putting Makita's strengths toward expanding sales of cordless OPE.

Leveraging the strength we have accumulated in developing, marketing, and manufacturing power tools, we are dedicating effort toward growing sales of cordless OPE while contributing to solving the environmental issue of exhaust and the social issue of labor shortages.

Development front

Recharging-control and motor technologies fostered for power tools

Makita preceded other companies in pioneering the use of lithium-ion batteries in power tools and since that time has driven product development with industry-leading recharging-control and motor technologies.

In recent years, advances in higher motor output and higher battery capacity have made using battery-powered products much the same as using engine-powered products, and Makita has expanded our lineup of cordless OPE.

Marketing front

A sales and service network spanning the globe

Following our policy of being closely aligned with markets and customers, we have a globally preeminent sales and service network. Leveraging this network, we provide fast and precise service, specific to customer needs, while also gathering feedback on our sales and services worldwide. We also hold many events and activities allowing users across the globe to experience the advantages of cordless OPE.

Manufacturing front

Timely manufacturing and supply that meets regional demand

With our plants in eight countries around the world, Makita is able to manufacture products in a timely fashion and supply them to meet regional demand. Furthermore, by using robots and on-site ingenuity, we are building a framework that can consistently manufacture high-quality products regardless of the individual experience, expertise, or artisanship of each region's workers.

ESG Management

Environment

The "Go Green" slogan symbolizes Makita's commitment to continually providing new value as a comprehensive international supplier of tools. We hope to always remain a company that maintains a steady eye on society, challenging ourselves to create a "sustainable recycling-oriented society" that combines the environment with the economy.

Environmental Policy

Basic Principles

As a global supplier of power tools used in building homes and in everyday life, Makita is aiming to conduct a wide range of environmental protection activities, in order to contribute to have sustainable society and conservation of biodiversity.

Policies

- 1. Enforcement of environmental administrative structure
- 2. Continuous improvement and pollution prevention
- 3. Compliance with applicable laws and regulations
- 4. Establishment and review of objectives and aims
- 5. Reduction of environmental burden
- 6. Disclosure

Please see the Company website for the full text of our policies.

Environmental Management

Makita has established and run its own environmental management system since 1998. After that year, for the purpose of leveraging that system as a tool for mitigating environmental burdens, our Head Office and Okazaki Plant first received ISO 14001 certification in 2007. In later years, all of our overseas production bases received the certification and are now operating environmental management systems.

We promote the protection of the environment at all of our business bases and carry out activities, such as Internal Environmental Audits and environmental education, based on the requirements of the certification.

Environmentally Conscious Design

Makita's concepts for environmentally conscious products began with a product assessment in 1992 and was followed by the codification of the Makita's Global Environment Charter in 1993, the year that we kicked off our full-fledged development of products that take the environment into consideration.

We have endeavored to improve the energy efficiency, weight, and longevity of products, while also using materials that are considerate of the environment, as we continue developing tools that can be recycled.

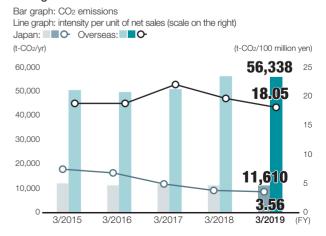

Preventing Global Warming

Makita is striving to improve environmental issues and, particularly with regard to trying to prevent global warming, has been dedicating effort toward reducing CO₂ emissions.

In addition to energy-saving activities such as installing LED lighting and high-efficiency equipment (AC units, compressors, manufacturing machinery, etc.), we also carry out awareness activities. These include distributing energy-saving promotional material to employees and making regular patrols checking energy-saving responses in offices and plants.

Changes in CO₂ emissions

Quality Assurance

Makita has established a framework for assuring quality in all processes, from the design stage through mass production.

First, development strives to better incorporate certain features into product designs so that malfunctions do not occur. Next, evaluations are made from multiple

perspectives (legal compliance, standards compliance, functionality, durability, etc.) and the product is tested to ensure that customers can use it safely, securely, and to their satisfaction.

CSR Procurement

Makita believes that working with business partners to promote procurement emphasizing social considerations is important in order to establish a framework for supplying safe, high-quality products.

Makita has created a "Basic Policy on Procurement" and requires that business partners comply with legal and social codes (including preventing corruption). We ask that partners pay due consideration to human rights and occupational health and safety (including prohibitions against forced labor, child labor, and human trafficking) and also give due consideration to the environment. We also carry out annual environmental protection activity surveys of business partners every year as we promote responsible procurement.

Fostering Human Resources

What supports our growth is nothing other than the talents of the people working at Makita: "Don't be angry, arrogant, panic, mope, or give up." These are the words of Jujiro Goto, who along with founder Mosaburo Makita built this company and transformed it into "a power tools corporation." Grounded in this personal philosophy of Mr. Goto, we strive to provide each and every Makita employee with the opportunity to exercise his or her talents.

For training programs, we carry out stratified training (tailored to match each employee's career stage), correspondence training, as well as actively offering on-site, overseas job training for young employees, in order to allow our workers to build up professional skills as we foster human resources capable of being active on a global stage.

Diversity Promotion

Makita strives to create a workplace that gives diverse employees a sense of purpose and a secure environment for their professional activity.

Hiring Employees of Foreign Nationality

Approximately 80% of Makita Group employees are hired overseas and international students are also hired in Japan.

Additionally, as a company that emphasizes a local, on-site business philosophy, we have, for many years, placed weight on diverse employees who can localize our business practices. Evidence of this is in the active contributions of employees with foreign nationality, including employees of overseas subsidiaries having been promoted to corporate officer positions at our Head Office.

Active Employment of Female Employees

In the Makita Group, female employees are actively contributing in numerous divisions. We have more than 150 women in management positions in the Group, which supports our global business platform.

ESG Management

Overview of the Corporate Governance Structure

Makita has adopted an Audit & Supervisory Board system. The Audit & Supervisory Board consists of four Audit & Supervisory Board Members, three of whom are independent Outside Audit & Supervisory Board Members who are not and have not been employed by the Corporation, including two who serve in a part-time capacity. This system allows the two standing Audit & Supervisory Board Members to audit the execution of duties by Directors at all times. Two of the four Audit & Supervisory Board Members have considerable knowledge of finance and accounting. Makita's Articles of Incorporation stipulate that the number of Audit & Supervisory Board Members shall not exceed five.

The Board of Directors determines basic policies, matters required by law, and important matters relating to management. Makita introduced a Corporate Officer system in June 2009 to facilitate prompt implementation of the Group strategy and strengthen the business execution structure. As such, Makita strives to engage in flexible and efficient business operations, while enhancing corporate value. The Board of Directors currently consists of thirteen Directors, two of whom are independent Outside Directors. Makita's Articles of Incorporation stipulate that the number of Directors shall not exceed fifteen.

Internal Audits and Audits by Audit & Supervisory Board Members

As an independent organization in charge of Makita's internal audits, the Internal Audit Division conducts the internal audits necessary to maintain the soundness of Makita's management.

With regard to audits by Audit & Supervisory Board Members, in accordance with the audit policy and division of duties established by the Audit & Supervisory Board, the four Audit & Supervisory Board Members attend meetings of the Board of Directors and other important meetings, receive reports on operations from the Directors, read important documents such as approval requests, and examine the status of operations and assets at the Head Office and principal places of business. They request business reports from subsidiaries, and as necessary, visit important subsidiaries to examine the status of operations and assets. They also share information by receiving, as needed, audit reports and reports on Makita's condition from the Accounting Auditor.

Relationships with the Outside Directors and Outside Audit & Supervisory Board Members

Outside Director Mr. Akiyoshi Morita has amassed intimate knowledge of corporate management through many years of participating in the management of Toyota Motor Corporation and Aichi Steel Corporation, a core company of the Toyota Group. Mr. Morita attends meetings of Makita's Board of Directors and is responsible for strengthening management oversight functions, using his experience and knowledge as a management professional cultivated

The following is a schematic diagram of the Makita Group's corporate governance structure

throughout his career, offering advice and recommendations in accordance with that role.

Outside Director Mr. Masahiro Sugino has intimate knowledge of corporate management through many years of involvement in running INAX Corporation and LIXIL Group. Mr. Sugino attends meetings of Makita's Board of Directors and is responsible for strengthening management oversight functions, using his experience and knowledge as a management professional cultivated throughout his career, offering advice and recommendations in accordance with that role.

Although the Makita Group has business transactions with Aichi Steel Corporation and LIXIL Corporation, where Mr. Morita and Mr. Sugino were previously employed, the transactional relationships are not material, due to the transaction amounts being minor.

Outside Audit & Supervisory Board Member Mr. Akira Kodama has many years of experience at financial institutions, in addition to his professional knowledge of finance. He attends meetings of Makita's Board of Directors and Audit & Supervisory Board, offering opinions based on his perspective as an experienced professional.

Outside Audit & Supervisory Board Member Mr. Fusahiro Yamamoto has amassed intimate knowledge of corporate accounting in his capacity as a certified public accountant. He attends meetings of Makita's Board of Directors and Audit & Supervisory Board, offering opinions based on his perspective as an experienced professional.

Outside Audit & Supervisory Board Member Mr. Shoji Inoue has professional knowledge and abundant experience as an attorney. He attends meetings of Makita's Board of Directors and Audit & Supervisory Board, offering opinions based on his perspective as a professional.

Although the Makita Group has business transactions with The Hekikai Shinkin Bank, where Mr. Kodama was previously employed, the transactional relationship is not material, due to the business transactions being deposit-only.

Makita deems there is no risk of conflict of interest with ordinary shareholders and has designated Outside Directors Akiyoshi Morita and Masahiro Sugino as independent Directors and Outside Audit & Supervisory Board Members Akira Kodama, Fusahiro Yamamoto, and Shoji Inoue as independent Audit & Supervisory Board Members in accordance with the regulations of financial instruments exchanges. Makita has entered into agreements with the above-mentioned two Outside Directors and three Outside Audit & Supervisory Board Members, with respect to their liability for damages to the Corporation as prescribed in Article 423, Paragraph 1, of the Companies Act, to limit the total amount of liabilities to the sum of the amounts prescribed in the items of Article 425, Paragraph 1, thereof.

The role of Makita's Outside Directors is to strengthen the efficacy of oversight by the Board of Directors concerning the duties by Directors, from an impartial, external perspective with no possibility of conflict of interest with ordinary shareholders. Moreover, Outside Audit & Supervisory Board Members of the Corporation have their own specialist expertise. Their role is to audit the execution of business by Directors, from an impartial, external perspective with no possibility of conflict of interest with ordinary shareholders. To properly fulfill their roles, Outside Directors and Outside Audit & Supervisory Board Members receive reports on business performance, internal control systems, and the like at Board of Directors meetings, where they cooperate with each other and exchange opinions as necessary. Makita has not established particular criteria or policies covering the independence of Outside Directors. When appointing Outside Directors and Outside Audit & Supervisory Board Members, we refer to criteria on the independence of Outside Directors determined by financial instruments exchanges. Accordingly, we believe our system for appointing Outside Directors and Outside Audit & Supervisory Board Members is appropriate.

Length of Appointment and Attendance at Board of Directors and Audit & Supervisory Board Meetings

0			•	
Classification	Name	Length of appointment (tenure)	Attendance at Board of Directors meetings (fiscal year ended March 31, 2019)	Attendance at Audit & Supervisory Board meetings (fiscal year ended March 31, 2019)

ESG Management

Policy on the Determination of Remuneration for Directors

Compensation (for the year ended March 31, 2019) for Makita Directors is comprised of monthly salaries, bonuses, and stock options. Monthly salaries for Directors are paid according to position and the like, within limits for total monthly compensation prescribed by resolution of the General Meeting of Shareholders.

Director bonuses, which Directors (excluding Outside Directors) are eligible for, are linked to consolidated business results, with the aim of raising Directors' motivation to improve business performance.

Seeking to increase morale and motivation to help improve corporate value over the medium and long terms, Makita issues stock compensation-type stock options to Directors (excluding Outside Directors) so that they share the risks and rewards of stock price fluctuations with shareholders. In the fiscal year ended March 31, 2019, total compensation of 386 million yen was paid to 13 Directors. This included base compensation of 120 million yen, bonuses of 226 million yen (not applicable to the two Outside Directors), and stock options of 40 million yen (not applicable to the two Outside Directors).

At the 107th General Meeting of Shareholders held on June 26, 2019, the Corporation passed a resolution to adopt a restricted share-based compensation plan in place of the stock option-based compensation plan.

To ensure independence from management, the total amount of compensation for Audit & Supervisory Board Members is fixed, with the specific amount determined in consultation with auditors. In the fiscal year ended March 31, 2019, total compensation of 41 million yen was paid to four Audit & Supervisory Board Members.

Risk Management

In accordance with Makita's system for internal control based on the Companies Act, Makita strives for risk management and endeavors to be a company that is resilient toward crises.

The Disclosure Committee, which identifies and investigates risks in the Group's business activities, holds annual meetings attended by the representative Directors, Directors in charge, standing Audit & Supervisory Board Members, and General Managers of the Internal Audit Division and respective departments of the Company. Matters that are deemed possible risk factors are disclosed on Makita's website.

Each Director exercises authority and takes responsibility for implementing the Group-wide risk management framework in his or her own division, and also reports to the Board of Directors and Audit & Supervisory Board when a situation occurs

that is material to business management. Also in each division, regulations and guidelines are stipulated and followed in order to carry out risk management necessary for quality control, disaster prevention, capital utilization, and the like.

Amidst concern in recent years over the occurrence of major earthquakes and other natural disasters, Makita recognizes that being able to respond to disasters is a critical issue. Makita has formed a Fire & Disaster Prevention Committee comprised of the heads of relevant divisions and has formulated disaster prevention regulations with this committee at the center. These disaster prevention regulations and other measures, which are reviewed regularly, define steps for disaster prevention, emergency response measures, and disaster recovery efforts. Similarly, these regulations and measures outline a business continuity plan (BCP) for times of disaster. The target organizations and scope of this plan are also reviewed as necessary.

Compliance

Makita holds a philosophy of "striving to exist in harmony with society," which is a uniform approach affecting our Management Policy / Quality Policy. As such, we thoroughly ensure that executives and employees comply with legal, regulatory, and ethical principles. Makita's "Code of Ethics" and "Guidelines to the Code of Ethics for Makita," which outline the conduct expected of Group Executives and employees, stipulate the importance of ethical conduct, avoiding conflicts of interest, complying with relevant laws and social standards, properly disclosing information, respecting human rights, restricting gifts and incentives, prohibiting bribes, and prohibiting unfair business transactions. Executives and employees are provided with regular information and training about Makita's "Code of Ethics" and "Guidelines to the Code of Ethics for Makita." In order to instill an awareness of the importance of compliance, employees are given an Ethical Compliance Survey, while new hires and newly appointed managers are provided with compliance training.

In order to minimize, preempt, and if necessary, quickly discover and resolve, conduct in violation of the "Code of Ethics," Makita has established "Regulations Regarding Corporate Ethics Helpline (Internal Reporting)" with provisions for accepting internal as well as external reports. Thorough measures are taken in these regulations to protect whistleblowers so that they do not incur any disadvantage for reporting to the Corporate Ethics Helpline. If necessary, the content of reports is also shared within the Company, and steps are taken in order to remedy and prevent recurrence of the matter in question.

Messages from Outside Directors

We will further polish Makita's strength of making operations "visual" as we improve Group governance.

On the Board of Directors, top management follows a thorough approach toward outlining global conditions and the market environment, while precisely identifying Makita's position in that context. This allows us to make decisions on future challenges and strategies. Additionally, each Director diligently visits work-sites inside and outside Japan in order to understand issues and create a corporate culture that implements local alignment with local products. Consequently, even as the market environment fluctuates greatly, Directors are able to take specific steps in their area of responsibility so that top management is not acting arbitrarily without consultation.

Makita has an overseas sales ratio above 80%, coupled with a sales network and service framework that spans the globe. Our greatest strength is highly visible Group-wide governance directed by Head Office management. In order to further increase our corporate prowess, I think that it will be important for us to have management that leverages this strength, hones our know-how to a new level, and boosts our technical capabilities. In addition, I would like us to encourage young professionals to challenge in new fields utilizing Makita's strengths.

Mr. Akiyoshi Morita Outside Director

Appointed to the position of Makita Outside Director in June 2013 Outside Director Mr. Morita has amassed impressive knowledge of corporate management through many years of participating in the management of Toyota Motor Corporation and Aichi Steel Corporation, a core company of the Toyota Group.

In order to contribute to the sustainable development of the Company, we will fulfill check-and-balance functions from an objective standpoint.

In recent years, Makita has emphasized power tools as well as shifting from engine-powered to battery-powered gardening equipment, while being keenly aware of developing environmentally friendly products that are easy to use, quieter, and more energy efficient. Furthermore, Makita's management has emphasized more than profit alone and has broadened its focus to include higher customer satisfaction. The result of this mindset has been increased demand, new customer markets, and greater shareholder value as we continue to grow sustainably. At the same time, I think that a challenge for us going forward is to pursue further diversity.

Currently, Makita is actively growing our business and recording steady performance in the process. In this context, I would like to offer, as an objective Outside Director, advice and suggestions that fulfill checks and balances in order to contribute to Makita's sustainable development and continually ensure governance, transparency, ethical conduct, and a structure that preempts any improprieties at our subsidiaries.

Mr. Masahiro Sugino Outside Director

Appointed to the position of Makita Outside Director in June 2015 Outside Director Mr.Sugino has intimate knowledge of corporate management through many years of involvement running LIXIL Group Corporation, including INAX Corporation.

10-Year Summary

Makita Corporation and subsidiaries for the years ended March 31

^{3.} The Company implemented a two-for-one common stock split, effective April 1, 2017. Figures for Earning per share (basic) Net income attributable to Makita Corporation common shareholders, total Makita Corporation shareholders' equity per share, average number of shares outstanding, and number of shares issued excluding treasury stock are calculated based on the assumption that the relevant stock split was carried out for prior years as well. Regarding cash dividends applicable to the year per share, actual dividend amounts before the relevant stock split are stated.
