Explanation regarding proper use of business forecasts, and other significant matters

1. The financial forecast given above is based on information as available at the present time, and includes potential risks and uncertainties. As a consequence of the factors above and other, actual results may vary from the forecasts provided above. Regarding the assumptions for the forecasts and other matters, refer to "SUPPLEMENT INFORMATION (CONSOLIDATED)", "3. Outlook for the fiscal year ending March 31, 2021" on page 4.
2. Makita's basic policy on the distribution of profits is to maintain a consolidated dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 10 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on profit attributable to owners of the parent after certain adjustments.

The Board of Directors plans to meet in April 2021 for a report on earnings for the year ending March 31, 2021. At the time, in accordance with the basic policy regarding profit distribution mentioned above, the Board of Directors plans to propose a dividend equivalent to at least 30% of profit attributable to owners of the parent. The Board of Directors will submit this proposal to the General Meeting of Shareholders scheduled for June 2021.

The consolidated dividend payout ratio is calculated as annual dividends per share divided by consolidated profit attributable to owners of the parent per share (after adjustments for special circumstances) and multiplied by 100.

SUPPLEMENT INFORMATION (CONSOLIDATED)

1. Overview of operating results

(1) Explanation of Consolidated Operating Results

Looking at the international economic situation during the first nine months period, the world economy, which had fallen sharply due to the spread of the new coronavirus infection, was gradually recovering due to the government economic and financial policies; however, towards the end of the year 2020, there was another wave of COVID-19 outbreak in each area of the world, leading to continued or even stricter restrictions imposed on economic activities resulting in rising uncertainties over the economies.

Our consolidated financial results for the first nine months of the current consolidated cumulative period increased 18.2% year-on-year to 441,184 million yen due to strong sales mainly in domestic and developed countries, despite a decrease in overseas sales due to foreign exchange rate. In terms of profits, operating profit increased 29.1% year-on-year to 65,703 million yen (operating profit margin: 14.9%) due to increased sales despite an increase in a cost rate. Profit before income taxes increased 22.9% year-on-year to 65,414 million yen (profit margin before income taxes: 14.8%), and profit attributable to owners of the parent increased 21.6% to 46,890 million yen (ratio of profit attributable to owners of the parent: 10.6%).

Revenue results by region were as follows:

Revenue in Japan increased by 11.3% to 83,515 million yen compared to the same period of the previous year. This was due to steady demand for highly efficient cordless products at building and construction sites, as well as demand supported by government subsidies for sustaining businesses and nesting.

Revenue in Europe increased by 25.6% to 204,794 million yen as we demonstrated the strength of having bases in each country. Sales were up in response to demand for tools at building and construction sites and robust stay home demand amid travel restrictions imposed by the COVID-19 pandemic.

Revenue in North America increased by 18.5% to 66,224 million yen due to the promotion of our mainstay cordless products was successful in addition to stay home demand and demand for tools caused by an increase in the number of new housing starts.

In Asia, although the economy is gradually recovering sales were sluggish in many countries except China and Taiwan due to the stagnation of economic activities resulting from COVID-19 outbreak; consequently, sales decreased by 4.2% year-on-year to 29,127 million yen.

In Central and South America, although there was the significant depreciation of local currencies, sales volumes increased due to nesting demand and the strong demand for tools due to the resumption of economic activities and active sales activities; consequently, sales increased 5.0% year-on-year to 21,032 million yen.

In Oceania, sales increased 34.1% year-on-year to 29,101 million yen due to increased sales of cordless products including both cordless power tools and cordless outdoor power equipment led by nesting demand and Australian government policies to support the economies.

In the Middle East and Africa, despite continued impact led by COVID-19 outbreak, some countries were preparing for recovery in demand after the settlement of COVID-19, so sales increased 3.5% year-on-year to 7,391 million yen.

(2) Explanation of Consolidated Financial Position

Total assets as of December 31, 2020 increased by 77,070 million yen to 751,634 million yen compared to the balance as of March 31, 2020. This increase was mainly due to the rise in "Property, plant and equipment" and "Inventories."

Total liabilities increased by 25,585 million yen to 124,401 million yen compared to the balance as of March 31, 2020. This increase was mainly due to the rise in "Trade payables and other payables."

Total equity increased by 51,485 million yen to 627,233 million yen compared to the balance as of March 31, 2020. This increase was mainly due to the rise in "Retained earnings."

(3) Outlook for the fiscal year ending March 31, 2021

Although there were restrictions on sales activities affected by the COVID-19 and a decrease in overseas sales due to foreign currency exchange rate, sales until the third quarter performed better than expected due to stay home demand for tools led by people refraining from going out and also due to the solid demand for power tools at building and construction sites. Thereby, we have revised our earnings forecast.

Revised forecast for consolidated performance of the fiscal year ending March 31, 2021 (From April 1, 2020 to March 31, 2021)

	Yen (millions)				Yen

The above earnings forecast is based on the premise that economic activities will not stagnate due to restrictions imposed by government following the rebound of the COVID-19 outbreak. The exchange rates assumed for the business forecast are as follows.

[Preconditions]

The above forecast is based on the assumption of exchange rates of 105 yen to the U.S. dollar, 120 yen to the euro and 16.0 yen to the renminbi for the remaining three months period ending March 31, 2021.

The above forecast is based on the assumption of exchange rates of 106 yen to the U.S. dollar, 122 yen to the euro and 15.6 yen to the renminbi for the year ending March 31, 2021.

[Reference]

The exchange rates for previously announced forecasts that we announced on October 30, 2020 were 106 yen to the U.S. dollar, 121 yen to the euro and 15.4 yen to the renminbi for the year ending March 31, 2021.

Note: The above forecast is based on information as available at the present time, and includes potential risks and uncertainties. As a consequence of the factors such as COVID-19 infection status, actual results may vary from the forecast provided above.
