Explanation regarding proper use of business forecasts, and other significant matters

1. The financial forecasts and estimates in this Consolidated Financial Results are based on information available at the time of report issuance and certain assumptions judged to be reasonable, and therefore are not guarantees of future performance. As a consequence of the factors above and other, actual results may vary from the forecasts provided above. Regarding the assumptions for the forecasts and other matters, refer to "SUPPLEMENT INFORMATION (CONSOLIDATED)", "1. Overview of operating results", "(3) Outlook for the fiscal year ending March 31, 2025" on page 4.
2. Makita's basic policy on the distribution of profits is to maintain the total return ratio(*) at 35% or greater, with a lower limit on annual cash dividends of 20 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on profit attributable to owners of the parent per share after certain adjustments. The Board of Directors plans to meet in April 2025 for a report on earnings for the year ending March 31, 2025. At the time, in accordance with the basic policy regarding profit distribution mentioned above, the Board of Directors plans to propose a dividend equivalent to at least 35% of total return attributable to owners of the parent. The Board of Directors will submit this proposal to the General Meeting of Shareholders scheduled for June 2025.

$$* \text{Total return ratio} = \frac{\text{Cash dividend per share} + \left(\frac{\text{Total amount of purchased treasury shares during the year}}{\text{Average number of shares outstanding}} \right) \times 100}{\text{Profit attributable to owners of the parent per share (Excluding special factors)}}$$

SUPPLEMENT INFORMATION (CONSOLIDATED)

1. Overview of operating results

(1) Overview of operating results for the nine months ended December 31, 2024

Looking at the international economic situation during the nine-month period ended December 31, 2024, inflation is heading towards a slowdown overall, while European economic recovery is slow and Chinese economy remains sluggish. Trump's reelection in the US draw much attention on the direction of foreign and trade policy. In addition, with ongoing tensions in Ukraine and the Middle East, the outlook remains uncertain.

In the Group's consolidated business results for this period, despite lower sales in many regions due to weak demand for housing and restrained investment in the building and construction market as a result of monetary tightening in various countries, consolidated revenue increased 3.3% year on year to 568,555 million yen due to the impact of foreign exchange. In terms of profit, operating profit increased by 71.4% year on year to 82,334 million yen (operating profit ratio: 14.5%) driven by an improvement in the cost ratio due to the reduction of various costs and the impact of foreign exchange. Profit before income taxes increased by 81.6% year on year to 83,742 million yen (profit before income taxes ratio: 14.7%) and profit attributable to owners of the parent increased by 89.5% year on year to 61,843 million yen (ratio of profit attributable to owners of the parent: 10.9%).

Revenue results by region were as follows:

Revenue by region shows revenue in each market and differs from revenue in Segment Information (based on the source of shipments).

In Japan, 40Vmax lithium-ion battery series (XGT) and OPE underpinned sales, despite a challenging demand environment, including construction and building materials prices remaining at high levels and a decline in housing starts. As a result, revenue was 94,751 million yen, up 3.3% year on year.

In Europe, although the construction and building market remained sluggish due to continued high interest rates despite rate cuts, orders recovered steadily following inventory adjustments and the yen depreciated against the local currencies. As a result, revenue was 280,594 million yen, up 7.4% year on year.

In North America, housing investment was weak due to high interest rates and soaring prices for construction materials. Also, market competition has intensified. As a result, revenue was 66,145 million yen, down 9.6% year on year.

In Asia, demand for tools remained weak overall as the prolonged property recession in China has spread to neighboring countries. As a result, revenue was 33,441 million yen, down 2.9% year on year.

In Central and South America, sales continued to be strong in the major countries, and we made efforts to expand sales of XGT series and cordless OPE in various countries. As a result, revenue was 38,681 million, up 4.2% year on year.

In Oceania, although the real estate market remained sluggish due to the impact of monetary tightening, sales of cordless OPE underpinned sales and the yen also depreciated against the local currencies. As a result, revenue was 41,483 million yen, up 0.3% year on year.

In the Middle East and Africa, although there were variations depending on the country, construction and building demand was firm overall. As a result, revenue was 13,460 million yen, up 17.3% year on year.

(2) Overview of financial situation as of December 31, 2024

Total assets increased 48,745 million yen from the end of the previous fiscal year to 1,104,553 million yen. This increase was mainly due to the increase in "Cash and cash equivalents."

Total liabilities decreased 6,793 million yen from the end of the previous fiscal year to 173,809 million yen. This decrease was mainly due to the reduction in "Borrowings."

Total equity increased 55,538 million yen from the end of the previous fiscal year to 930,744 million yen. This increase was mainly due to the change in exchange differences on translating foreign operations included in "Other components of equity."

(3) Outlook for the fiscal year ending March 31, 2025

During the nine-month period of this fiscal year, despite sluggish sales growth due to the challenging environment for sales, profits were better than the Company's expectations due to the reduction of various costs and the impact of foreign exchange. While we expect the sales environment to remain challenging in the remaining quarter, given our recent financial performance, we are revising the forecast announced on October 30, 2024.
