#### Explanation regarding proper use of business forecasts, and other significant matters

1. The financial forecast given above is based on information as available at the present time, and includes potential risks and uncertainties. As a consequence of the factors above and other, actual results may vary from the forecasts provided above. Regarding the assumptions for the forecasts and other matters, refer to "SUPPLEMENT INFORMATION (CONSOLIDATED)", "1. Overview of operating results", "(3) Outlook for the fiscal year ending March 31, 2026" on page 4.
2. Makita's basic policy on the distribution of profits is to maintain the total return ratio(\*) at 35% or greater, with a lower limit on annual cash dividends of 20 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on profit attributable to owners of the parent per share after certain adjustments. The Board of Directors plans to meet in April 2026 for a report on earnings for the year ending March 31, 2026. At the time, in accordance with the basic policy regarding profit distribution mentioned above, the Board of Directors plans to propose a dividend equivalent to at least 35% of total return attributable to owners of the parent. The Board of Directors will submit this proposal to the General Meeting of Shareholders scheduled for June 2026.

$$* \text{Total return ratio} = \frac{\text{Cash dividend per share} + \left( \frac{\text{Total amount of purchased treasury shares during the year}}{\text{Average number of shares outstanding}} \right)}{\text{Profit attributable to owners of the parent per share (Excluding special factors)}} \times 100$$

## SUPPLEMENT INFORMATION (CONSOLIDATED)

### 1. Overview of operating results

#### (1) Overview of operating results for the six months ended September 30, 2025

Looking at the international economic situation during the six-month period ended September 30, 2025, while many countries including Europe agreed on US tariff rates, tariff negotiations continue with some countries such as China. The global trade environment has not yet recovered, and economic activity in various countries has generally remained sluggish. Furthermore, geopolitical uncertainty persists.

In this situation, the Makita Group has focused on expanding its lineup of cordless products, including power tools and outdoor power equipment (OPE) in the durable high-power “40Vmax Lithium-ion Battery” (XGT) series.

With respect to production, we worked to build a flexible framework capable of responding to geopolitical risks and changing demand environments by implementing technological innovations in production processes and improving our order management system.

We also work to increase the level of the community-based and customer-oriented service framework in order to further strengthen trusting relationships with customers around the world. We strive to deepen and develop the market centered on XGT series.

In the Group’s consolidated business results for this period, due to sluggish housing demand and restrained investment in the construction and building market because of remaining high interest rates in various countries, compounded by market disruption caused by U.S. tariff measures, consolidated revenue decreased 2.1% year on year to 378,421 million yen. In terms of profit, operating profit increased by 0.2% year on year to 51,495 million yen (an operating profit ratio: 13.6%) driven by an improvement in the cost ratio due to the impact of foreign exchange and the reduction of various costs. Profit before income taxes increased by 3.1% to 52,901 million yen (profit before income taxes ratio: 14.0%) and profit attributable to owners of the parent increased by 1.6% to 38,800 million yen (ratio of profit attributable to owners of the parent: 10.3%).

Revenue results by region were as follows:

Revenue by region shows revenue in each market and differs from revenue in Segment Information (based on the source of shipments).

In Japan, OPE and XGT series underpinned sales, despite a challenging demand environment, including a decline in housing starts and construction and building materials prices remaining at high levels. As a result, revenue was 65,864 million yen, up 3.7% year on year.

In Europe, although sales of OPE remained steady despite the effects of extreme weather, the construction and building market was sluggish due to continued high interest rates. As a result, revenue was 187,377 million yen, down 3.4% year on year.

In North America, housing investment was weak due to continued high interest rates and deteriorating job market amid an uncertain economic outlook and market competition intensified. As a result, revenue was 39,604 million yen, down 12.6% year on year.

In Asia, although demand for tools remained weak overall as the prolonged property recession in China has spread to neighboring countries, we have made efforts to expand sales of high-value-added products for non-residential sectors such as infrastructure and manufacturing industries. As a result, revenue was 23,142 million yen, up 5.9% year on year.

In Central and South America, although sales of XGT series and cordless OPE remained strong, the yen also appreciated against the local currencies. As a result, revenue was 24,528 million yen, down 4.5% year on year.

In Oceania, although we have made efforts to expand sales of cordless products with a particular focus on the XGT series and sales revenue increased in local currencies, the yen also appreciated against the local currencies. As a result, revenue was 27,764 million yen, up 0.7% year on year.

In the Middle East and Africa, construction and building demand remained strong primarily in oil-producing countries. As a result, revenue was 10,141 million yen, up 18.5% year on year.

(Efforts for carbon neutrality)

The impact of climate change on society, such as frequent wind and flood disasters, is becoming more serious, and companies are playing an increasingly important role in realizing a decarbonized society. We have identified contributing to a decarbonized society as a material issue that should be prioritized and are stepping up our efforts.

Therefore, the Group is currently working on the realization of a decarbonized society by focusing on cordless OPE that

does not emit exhaust gases during use as the next pillar of our future business in addition to power tools. In addition, with the goal of reducing our greenhouse gas (GHG) emissions, we have set targets for reducing GHG emissions from our business activities (Scope 1 and 2) by 50% by FY2030 from the FY2020 level and to net zero by FY2040 and reducing GHG emissions from the entire supply chain (Scope 3) to net zero by FY2050. In FY2024, Scope 1 and 2 GHG emissions increased 5.2% year on year to 60,016 t-CO<sub>2</sub>, and emissions per unit of revenue increased 3.9% to 8.0 t-CO<sub>2</sub> per 100 million yen. Meanwhile, Scope 3 GHG emissions increased 10.9% to 4,364,237 t-CO<sub>2</sub> due to an increase in the production volume, and emissions per unit of revenue increased 9.2% to 579.5 t-CO<sub>2</sub> per 100 million yen.

We will continue to work on the use of renewable energy and energy conservation in our business activities to achieve GHG emission reduction targets.

## (2) Overview of financial situation as of September 30, 2025

Total assets increased 23,527 million yen from the end of the previous fiscal year to 1,130,052 million yen. This increase was mainly due to the increase in “Inventories.”

Total liabilities increased 786 million yen from the end of the previous fiscal year to 174,816 million yen. This increase was mainly due to the increase in “Trade and other payables.”

Total equity increased 22,741 million yen from the end of the previous fiscal year to 955,236 million yen. This increase was mainly due to the increase in “Other components of equity.”

## (3) Outlook for the fiscal year ending March 31, 2026

Although the challenging demand environment persisted both in Japan and overseas, the consolidated business results for the six-month period under review were better than the Company’s expectations due to steady sales of outdoor power equipment (OPE), our efforts to reduce costs and the impact of foreign exchange rates. While we expect the sales environment to remain challenging in the third quarter and beyond, the exchange rates are expected to move in a more favorable direction than initially expected. Therefore, we are revising the forecast announced on April 28, 2025.

The assumed exchange rates applied in the forecast calculation are as follows;

[Preconditions]

The forecast is based on the assumption of exchange rates of 140 yen to the U.S. dollar, 165 yen to the euro and 20.0yen to the renminbi for the remaining six months period ending March 31, 2026.

The forecast is based on the assumption of exchange rates of 143 yen to the U.S. dollar, 167 yen to the euro and 20.2 yen to the renminbi for the year ending March 31, 2026.

[Reference]

The exchange rates for previously announced forecasts on April 28, 2025 were 140 yen to the U.S. dollar, 160 yen to the euro and 19.5 yen to the renminbi for the year ending March 31, 2026.

(Note)

The forecast is based on information as available at the present time and includes potential risks and uncertainties. As a consequence of the factors above and other, actual results may vary significantly from the forecast provided above.
