SUPPLEMENT INFORMATION (CONSOLIDATED)

1. Overview of operating results

(1) Overview of operating results for the fiscal year ended March 31, 2020

Looking at the global economic situation for the year ended March 31, 2020, increased uncertainty concerning trade dispute between China and U.S., confusion caused by Brexit, and increased intensity over political turmoil in the Middle East have led to worsened business sentiment regarding world economy; furthermore, the outbreak of COVID-19 has left significant damages on the world economy.

Under these circumstances, on the development side, the Makita Group concentrated its efforts on expanding lithium-ion battery product lineup, such as a new cordless tool series with “40Vmax lithium-ion battery” that realizes higher and maximized power output of tools as well as improved durability; cordless gardening equipment featuring work efficiency higher than engine-powered ones; cordless TV with radio utilized also at the time of disaster to gather information.

On the production side, we continued to implement measures including the promotion of multi-polarized global production, cost reduction through local procurement of components, and introduction of labor-saving or unmanned facilities.

On the sales side, we focused on expanding the sales of lithium-ion battery products. Furthermore, we worked hard to strengthen our community- and customer-based sales network by increasing sales and after-sales service bases and to strengthen our logistics by aggressive investments for warehouses and distribution facilities both in domestic and overseas.

Although overseas revenue translated into yen was eroded by currency exchange rates and there was a decrease in demand for tools due to COVID-19, our consolidated revenue for this period increased by 0.4% from the previous year to 492,617 million yen, record-high revenue, due to robust sales primarily in Eastern Europe and Japan. On profit side, despite increased revenue, operating profit decreased by 18.2% to 64,046 million yen (operating profit ratio: 13.0%), owing to an increase in revenue and administration costs and to the deterioration of the cost-of-sales ratio due to the impact of currency exchange rates and the additional tariffs imposed by U.S. on Chinese products. Meanwhile, profit before income taxes decreased by 17.4% to 66,008 million yen (profit before income taxes ratio: 13.4%) and profit attributable to owners of the parent decreased by 14.4% to 47,731 million yen (ratio of profit attributable to owners of the parent: 9.7%).

Consolidated revenue by region are as follows:

Consolidated revenue in Japan increased by 9.3% to 100,697 million yen compared to the previous year. This was due to labor shortage in building and construction sites resulting in strong sales of cordless power tools in search of efficiency and also due to strong sales of cordless gardening equipment.

Although consolidated revenue in Europe translated into yen was eroded resulting from appreciation of yen against Euro, consolidated revenue in Europe was supported by solid demand for power tools in almost all areas and steady sales growth of cordless gardening equipment until third quarter. Nonetheless, the impact of COVID-19 outbreak in the market towards the end of fourth quarter partially offset the increase in revenue, as a result, the consolidated revenue in full fiscal year increased only slightly by 1.4% to 216,230 million yen.

In North America, we aimed at expansion of sales of lithium-ion battery product including gardening equipment amid intensifying competition; however, due to eroded revenue after translation into yen by a depreciation of dollars and also to the impact of COVID-19 outbreak in the market towards the end of fourth quarter, consolidated revenue in North America decreased by 0.3% to 72,304 million yen.

In Asia, despite robust sales in some areas such as India partially offset the impact of slowing economy in China until third quarter, the impact of COVID-19 outbreak in the market from the second half of fourth quarter resulted in decreased consolidated revenue in Asia by 4.7% to 38,998 million yen.

Consolidated revenue in Central and South America decreased by 6.5% to 26,000 million yen. This was due to a depreciation in each country's currency against yen and slowing economy in main countries despite our effort to expand sales mainly of lithium-ion battery products.

In Oceania, we aimed at expanding sales of product such as cordless gardening products amid impact of slowing demand in Australian housing market; however, consolidated revenue this market declined by 6.0% to 28,421 million yen due to COVID-19 outbreak towards the end of fourth quarter in the market and also to the yen's appreciation against local currencies.

Consolidated Revenue in the Middle East and Africa decreased by 27.6% to 9,967 million yen. This was due to poor sales amid political and economic turmoil in the Middle East.

(2) Overview of financial situation for the fiscal year ended March 31, 2020

Total assets as of the end of the year decreased by 5,686 million yen to 674,564 million yen compared to the previous year. The decrease was mainly due to the decrease in “other financial assets” and “trade receivables and other receivables” although there was an increase in right-of-use assets following the adoption of IFRS 16th lease regulation.

Total liabilities decreased by 4,212 million yen to 98,816 million yen compared to the previous year due mainly to an increase in “trade payables and other payables” as well as “borrowings” despite an increase in other financial liabilities following the adoption of IFRS 16th lease regulation.

Total equity decreased by 1,474 million yen to 575,748 million yen compared to the previous year. This decrease was mainly due to exchange gain or loss recognized in “exchange differences on translating foreign operations” included in the “other components of equity”.

(3) Overview of cash flow situation for the fiscal year ended March 31, 2020

Total cash and cash equivalents amounted to 143,439 million yen, decreased by 3,073 million yen compared to the end of the previous year.

Net cash provided by operating activities amounted to 57,310 million yen (23,155 million yen in the previous year), up 34,155 million yen over the previous year due to less amount of increase in inventory compared to the previous year.

Net cash used in investing activities amounted to 30,506 million yen (15,329 million yen in the previous year), up 15,177 million yen over the previous year, due mainly to an increase in purchase of non-current assets.

Consequently, free cash flows (the sum of cash flows from operating activities and investing activities) amounted to 26,804 million yen (7,826 million yen in the previous year), up 18,978 million yen over the previous year.

Net cash used in financing activities amounted to 22,931 million yen (8,231 million yen in the previous year), up 14,700 million yen over the previous year, due to an increase in repayment of short-term borrowings.

(4) Outlook for the fiscal year ending March 31, 2021

In the future, the Makita Group expects that the prospect for the global economy will continue to be uncertain. Meanwhile, the Group believes that demand for environmental and human friendly tools that contribute to the solution of social issues, such as the labor shortage and environment conservation by increased efficiency of works, will continue to increase further both in emerging and developed countries.

To cope with these assumed conditions, Makita will:

- Strengthen its R&D and product development capabilities, mainly for the technologies of motors and technologies for discharge/charge of batteries, to take the initiative in cordless products market;
- Position cordless gardening equipment as a future pillar of its business after power tools and focus its efforts on the development and sales expansion of new products;
- Implement measures to strengthen and improve the efficiency of production, procurement and distribution, while further upgrading global production bases; and
- Strive to raise its brand power by promoting the establishment of a sales and after-sales service network to offer community-based and fine-tuned response to needs of customers around the world.

On the basis of these factors, the Group will strive to maintain a solid presence in the industry and contribute to achieve a sustainable society as a global supplier power tools used in home-building and in everyday life.

(Risks associated with COVID-19)

With regard to COVID-19, the stagnant economic activity due to the worldwide spread of the infectious diseases may lead to a decline in tool demand and a decrease in the revenue and profits in the Group, which has a high overseas sales ratio. The spread of infection, especially in Europe, Japan and North America, where sales ratios are high, may have a significant impact on the company's performance.

At the time of COVID-19 outbreak in China in February 2020, the Group's China plant temporarily reduced production and halted operations. If COVID-19 spreads again in China, where the Group's production ratio is high and suppliers are concentrated, it could have a significant impact on the Group's production and sales activities.

(Financial forecast for fiscal 2021)

We have determined that it is difficult at present to reasonably forecast the consolidated financial performance for the fiscal year ending March 2021 due to uncertainty over the value of an impact resulting from the global epidemic of COVID-19 on its performance. We plan to disclose our financial forecasts as soon as possible.

(5) Basic policy regarding profit distribution and cash dividend for the fiscal 2020 and 2021

Makita's basic policy on the distribution of profits is to maintain a consolidated dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 10 yen per share. However, in the event special circumstances, computation of the amount of dividends will be based on consolidated net income attributable to Makita Corporation after certain adjustments. With respect to repurchases of its outstanding shares, Makita aims to implement a flexible capital policy, augment the efficiency of its capital employment, and thereby boost shareholder profit. Also Makita continues to consider execution of own share repurchases in light of trends in stock prices.

Makita intends to maintain a financial position strong enough to withstand the challenges associated with changes in its business environment and other changes and allocate funds for strategic investments aimed at expanding its global operations.

Our forecast for dividends is as follows;

	For the year ended March 31, 2020 (Result and Forecast)	For the year ending March 31, 2021 (Forecast)
Cash dividend per share:		
Interim	10.00 yen	10.00 yen
Year-end.....	43.00 yen	(Note)
Total.....	53.00 yen	(Note)

Note: The Board of Directors plans to meet in April 2021 for a report on earnings for the year ending March 31, 2021.

At such time, in accordance with the basic policy regarding profit distribution mentioned above, the Board of Directors plans to propose a dividend equivalent to at least 30% of profit attributable to owners of the parent.

The Board of Directors will submit this proposal to the General Meeting of Shareholders scheduled for June 2021. However, if certain special circumstances arise, computation of the amount of dividends will be based on consolidated net income attributable to Makita Corporation after certain adjustments.

The consolidated dividend payout ratio is calculated as annual dividends per share divided by consolidated net income attributable to Makita Corporation per share (after adjustments for special circumstances) and multiplied by 100.

2. Basic Rationale for Selection of Accounting Standards

Makita has voluntarily adopted International Financial Reporting Standards (IFRS) from the fiscal year ended March 31, 2019 in order to improve global comparability in financial market.

Changes in accounting policies:

The Makita Group has adopted IFRS 16 “Lease” (“IFRS 16”) from the first three-month period of the year ended March 31, 2020.

In accordance with IFRS 16, the Group has recorded leases that had been classified as operating leases under IAS 17 “Lease” as right-of-use assets and lease liabilities in the consolidated statement of financial position.

On transition to IFRS 16, the Group has chosen to apply the practical expedient that allows the Group to continue using the same method as before with regard to whether contracts are leases or not.

In line with the transition provision in IFRS 16, the Group has adopted the modified retrospective approach (a method to recognize the cumulative effects of adopting IFRS 16 at the date of adoption) at the date of transition.

At the first date of the year ended March 31, 2020 (“the date of initial application”), the Group additionally recognized total assets including right-of-use assets (which were included in property, plant and equipment in the consolidated statement of financial position) of 10,656 million yen and lease liabilities of 10,656 million yen (which were included in other financial liabilities).

The Group measured the lease liabilities at the date of initial application at the present value of aggregate residual lease payments at the inception of adoption, discounted using the lessee’s incremental borrowing rate of interest at the inception of adoption. As of the date of initial application, the weighted average of the incremental borrowing rate was 2.5%.

On transition to IFRS 16, The Group has adopted the following practical expeditors:

- Applying a single discount rate to a portfolio of leases with reasonably similar characteristics.
- Applying the exemption on not recognizing right-of-use assets or lease liabilities for leases for which the lease term ends within 12 months of the date of initial application.

Notes: The table shows the changes in the percentage ratio of revenue, operating profit, profit before income taxes, and profit attributable to owners of the parent compared to the previous year.

We have determined that it is difficult at present to reasonably forecast the consolidated financial performance for the fiscal year ending March 2021 due to uncertainty over the value of an impact resulting from the global epidemic of COVID-19 on its performance. We plan to disclose our financial forecasts as soon as possible.
